PROFESSIONAL SUMMARY

Information Technology graduate with a strong interest and deep passion for Artificial Intelligence, Natural Language Processing (NLP), Data Analysis, emerging technologies, and Software Engineering. Completed intensive technical training at Smart Methods, gaining valuable hands-on exposure to professional work environments, teamwork, and technology-based solutions. Driven by a desire to solve real-world problems through innovative digital solutions, continuously developing technical skills, and growing in areas related to production-ready AI application. Proven track record of delivering high-quality academic projects and securing 1st place in a university-level hackathon.

PROFESSIONAL EXPERIENCE

IT Co-op Intern - Web Development & NLP

Smart Methods Company | June 2025 - August 2025

- Completed an intensive 420-hour training program encompassing Web Development and Natural Language Processing (NLP) pipelines, building strong foundational and practical execution skills.
- Designed, programmed, and deployed source code integrated into 4 distinct technical projects, all of which successfully evolved into commercially available products in the market.
- Collaborated within cross-functional teams to resolve complex programming tasks, apply theoretical technical concepts to real-world assignments, and improve task execution within an Agile professional setting.

EDUCATION

Bachelor of Information Technology

Aug 2021 - June 2026

Qassim University, College of Computer | GPA: 4.02 / 5

Relevant Coursework: Data Structures, Algorithms, Database Systems, Machine Learning, Computer Networks, Information Security & Privacy, Data Mining & Storage, Advanced Database Systems.

PROJECTS

Solar Energy Forecasting System - Graduation Project

2025 - 2026

Deep Learning | Python, TensorFlow, Keras, Streamlit

- Developed an AI-based solar forecasting system using deep learning models to support sustainable energy planning and operational decisions.
- Integrated NASA POWER and K.A.CARE datasets for model training, evaluation, and solar irradiance forecasting.
- Applied data preprocessing, cleaning, feature engineering, scaling, and time-series preparation for historical sequences.
- Built and evaluated LSTM, GRU, and CNN-LSTM models across 1h, 3h, and 24h horizons using MAE, RMSE, and R² metrics.
- Developed a Streamlit dashboard to visualize forecasts and support stakeholder decision-making.

Automated Cars Service System - Software Engineering Project

2024

Software Engineering | Agile, UML, SRS/SDD Documentation

- Co-developed an AI-driven smart ride-booking and car service platform using Agile/Scrum practices.
- Prepared SRS/SDD documentation covering functional and non-functional system requirements.
- Produced UML diagrams, including Class, Sequence, Activity, and State diagrams, to define the system architecture.
- Applied AES encryption and Multi-Factor Authentication (MFA) concepts to strengthen data protection.
- Supported iterative delivery through sprint cycles, teamwork, and stakeholder feedback.

ACHIEVEMENTS

- 1st Place - Innovation Incubator Hackathon, Qassim University | 2026: Secured first place in the first stage of the hackathon for Wahaj Forecast, a specialized SaaS solar forecasting platform leveraging deep learning models to support renewable energy operational decisions and grid management.

TECHNICAL SKILLS

AI / Machine Learning: TensorFlow, Keras, Scikit-learn, LSTM, GRU, CNN-LSTM, Time-Series Forecasting, NLP
Programming & Data: Python, SQL, Java, C++, Pandas, NumPy, Data Preprocessing, Feature Engineering, Data Visualization

Software Engineering: Agile/Scrum, UML (Class, Sequence, Activity, State), SRS/SDD Documentation

Web Technologies: HTML, CSS, JavaScript

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Streamlit Dashboard Development, Microsoft Office Suite

Operating Systems: Windows, Linux

SOFT SKILLS

Problem Solving, Teamwork & Collaboration, Communication, Time Management, Fast Learning

LANGUAGES

- Arabic - Native
- English - Professional Working Proficiency
